**Gsdx11 Plugin For Pcsx2 16 ##BEST##**

[Download](#)

---

Oct 5, 2014 Ive successfully compiled it on my PC (i5 4450, GeForce GTX260,12GB RAM,64 bits OS). And if not, i can give u more information.

Jun 4, 2018 Hello there,I want to know that how to install the gsdx11.nfo file (which is in game folder) to the PCSX2. When i doubleclick on the gsdx11.nfo file my game is off, because the 'HotKeys' folder dont have any gsdx11 file in it. I am using Pcsx2 emu (2.0) and have:

Jun 12, 2018 I've been having problems in running GSDX11, when I press a button in-game it closes (seemingly without any errors) and the console shows this: (voxel.crat) (1)  
Error:GetProcAddress(graphics\_hw\_sse4.dll, "voxel\_map")

Jun 23, 2018 I'm trying to follow these steps: but I can't make it work, the plugin causes the game to freeze when I press some buttons. I'm using gsdx11 1.1.4. I'm running a Nvidia GTX 1050, windows 10.

Nov 23, 2018 I'm using a GTX 650ti and the game boots only at the main menu (I've never been able to run it). It's not all the same problem that you have, I don't know what to do, I've spend hours trying to configure everything so I can even try to install graphics plugins, but I can't do so because I can't boot the game.

Nov 25, 2018 I've been trying to install GSDX11 (after editing the file GSDX.cfg) in my pcsx2 but i can't install it. All i get is an error when I try to run the game:

Nov 27, 2018 I've been trying to install GSDX11 (after editing the file GSDX.cfg) in my pcsx2 but i can't install it. All i get is an error when I try to run the game:

Nov 27, 2018 I know this might be a bit off

---

THANX FOR UPLOADED!! . Perhaps you could also try with Windows 10 pre-release software in order to test the impact of Windows 10 compatibility under your GPU. On Windows 10, both NVidia and AMD GPUs have DX11 H. If you get positive results, you could also try to clarify with Microsoft, but you should also be aware that the Windows 10 may change the filesystem way of installation, which means that using the Microsoft Windows Store may not be the best way to update your software (and I'm not sure that this possibility has been tested for a DX11 application, but it is worth checking). Ok sorry, try now the Pcsx2 version, I have another Pcsx2 download version, but try the spesific windows version you have (I need to instal it ). Hope it helps!! It does not work for all game. For example some games(SBK 1.8, BC ) I have lag ( game card is GeForceGT X70). Maybe you can try it. I've tested it and I had lag on the game. But if I test with dx10 then Its fine. Another strange thing to say is that I installed it, and the DirectX version doesn't mention anything. But on this link ( I found a generic version of the pluggin for all DX version (DX9, DX11 ) [download\\_link "path\\_to\\_plugin"](#) I noticed that some games, require specific DirectX, but on his GitHub page it only says. Minimum: DirectX 9.0c In my opinion, it's different to Vista, I think that because Vista optimized the game and the pluggin so. As I'm trying to change the windows version at first... But it does not work well (maybe because of patches or additional

---

requirements ). wait for my next update. This is all I can help you with this question. Q: How to start a service for a specific time interval? I have created a service, it works fine, but I just realized that the service runs automatically, and I don't know how to prevent it, I will start service once in 24hrs, How can I
