Totally Unattended Kiosk Crack+

The Blaser Software Totally Unattended Kiosk is an advanced, Windows application whose purpose is to launch Internet Explorer at system startup for use in a kiosk environment. No one has to be loggen on the computer for Totally Unattended Kiosk to run the browser. The entire set of configuration options are predefined by you, including: allow/deny new browser windows and return the browser to your specified homepage after the computer sits idle. Totally Unattended Kiosk is ideal for vendors, information displays, demonstrations at trade shows and conferences, or anyplace you need a browser running unattended. As soon as the computer is poweredup and Windows starts, the Blaser Software Totally Unattended Kiosk will start and launch your kiosk page. Totally Unattended Kiosk Features: - Allows for totally unattended mode: the Kiosk will launch automatically. - Allows for a specified homepage to load if the computer is idle: when the PC is idle, a web page will be loaded. You have the option of starting a new browser window or switching to the Homepage that the user set in the setup. - Allows for plugins: the ability to install other applications, plugins and add-ons, this is just one of the many features the Kiosk offers. - Allows for new windows: with the use of plugins, you can open, close and create new browser windows. - Allows for session management: the user won't lose their place when they switch to another app or open a new browser window. The homepage used before the computer goes to idle will remain in memory. - Allows for the user to be logged off: in case the user has left the computer alone for a while, the user can be logged off. At that point, the Kiosk will log the user off and open up a specified homepage. - Allows for more than one Kiosk: with the use of plugins, you can create more than one kiosk within your computer. This means that you could have an off-line, demo kiosk running from one disk and an on-line, live, running from the other. - Allows for drag and drop of files: the software allows for the user to drag and drop files onto its icon to download them to the computer or show them in a folder. - Allows for the Kiosk to run automatically at the start of Windows: the Kiosk will run immediately
